

# ALGÉSAL SURACTIVE® Pomade 40 grams

Formula: 40 grams of pomade.

Active Substance	: Diethylamine salicylate.....	4.0 g
	: Nopoxamine.....	0.4 g
Excipient	: Lavender essence	

## Pharmacological Properties:

Algesal Suractive is immediately absorbed throughout skin; therefore it relieves the pain with its active principles which is in sufficient concentrations and a significant relief is achieved even in first fraction. Prepared as a white cream, Algesal Suractive with slight lavender odor has an effect on the application surface with a pleasing coolness.

## Indications:

Thanks to its anti-inflammatory, analgesic and contraction removing effects, Algesal Suractive Pomade is used as a fast analgesic in a local treatment manner in the conditions including joint and muscle rheumatism, twists, torticollis, lumbago, crushes, spasms, muscle cramps, and neuralgia.

## Special Warnings and Precautions for Use:

For external use only. Keep away from contact with eyes and mouth. If skin irritation occurs during the therapy, it should be discontinued. It should not be used in skin cracks and in children younger than 6 years of age.

CONSULT YOUR DOCTOR IF AN UNEXPECTED EFFECT ENSUES

## Administration Route and Dosage:

Algesal Suractive Pomade is completely absorbed from skin by slightly rubbing over all the painful areas. It should be used for a long period of time since the pain crisis is completely recovered. By using as friction and massage, Algesal Suractive Pomade is of help by relieving muscle hardening and pains in sportsmen caused by excessive effort and exhaustion.

It is not necessary to cover following application. Bandaging is also possible for some patients.

## Warnings regarding usage:

In order to use the tube, take the tap, remove the ring in screw and screw the tap to form a hole in the safety layer for pomade to flow.

Hands should be washed properly following use.

## Storage Conditions:

Keep this and all drugs out of reach of children and store in its packaging. It should be stored at room temperatures less than 25 °C.

Do not use without consulting your doctor.

## Subject to be taken into consideration:

For external use only. Keep away from contact with eyes and mouth. If skin irritation occurs during the therapy, it should be discontinued.
